HOW CAN YOU KEEP YOUR INFORMATION SAFE OVER THE LONG-TERM?

ISO 27001 INFORMATION SECURITY MANAGEMENT SYSTEMS AUDIT, CERTIFICATION & TRAINING SERVICES

The security of information systems and business-critical information needs constant managing to ensure your operational continuity and data protection. ISO 27001 Information Security Management Systems certification allows you to stand out from the competition through strong information security measurement.

Based on the principles of confidentiality, integrity and availability, the ISO 27001 covers:

- Information security policies
- Organisation of information security
- Human resources security
- Asset management
- Access control
- Cryptography
- Physical and environmental security
- Operations security
- Communications security
- System acquisition, development and maintenance
- Supplier relationships
- Information security incident management
- Information security aspects of business continuity management
- Compliance

THE BENEFITS

Most organisations could not function without secure information systems. The ISO 27001:2013 Information Security Management Systems (ISMS) standard considers every risk critical in identifying the dangers faced. Any disruption in the quality, quantity, distribution or relevance of data can put your business at risk.

ISO 27001:2013 enhances your organisation's credibility and demonstrates the integrity of your data and systems and your commitment to information security. It can also transform your organisation's culture, opening up new business opportunities with security conscious customers, improving employee ethics and strengthening the notion of workplace confidentiality.

HOW THE CERTIFICATION PROCESS WORKS

- Step A – Tailored proposal from SGS.
- Step B – Optional 'pre-audit' of readiness and weaknesses.
- Step C – Formal audit stage 1: 'Readiness review'. Documents and key system elements are evaluated and non-compliances reported.
- Step D – Formal audit stage 2: 'Interviews, examination of records and observation of working practices'. Non-conformances are addressed.
- Step E – Surveillance visits to check the system and action plan implementation.
- Step F – Re-certification audit after three years.

RELATED SERVICES

- ISO 27001:2013 training (all levels of ability and awareness). See www.sgs.com/training for details.
- Maturity Level ISMS assessment
- ISO 22301:2012 Business Continuity Management
- Integrated Management Systems

WHY SGS?

SGS is the world's leading inspection, verification, testing and certification company. SGS is recognised as the global benchmark for quality and integrity. With more than 85,000 employees, SGS operates a network of over 1,800 offices and laboratories around the world.

Enhancing processes, systems and skills is fundamental to your ongoing success and sustained growth. We enable you to continuously improve, transforming your services and value chain by increasing performance, managing risks, better meeting stakeholder requirements and managing sustainability.

With a global presence, we have a history of successfully executing large-scale, complex international projects. Our people speak the language, understand the culture of the local market and operate globally in a consistent, reliable and effective manner.
