

Registration – Technical Dossier
General Registrant Information
Name, address, telephone number, fax number and email address Contact person Location of registrant's production and own use site(s) Joint submission of data
Third party / Sole representative
Name, address, telephone number, fax number and email address Contact person
Identification Substance
Chemical name ,other names CAS / EINECS / ELINCS number or other identity codes Molecular and structural formula Information on optical activity and typical ratio of (stereo)isomers Molecular weight (range) Degree of purity (%) Nature of impurities Nature and order of magnitude of any additive Spectral data (UV, IR, NMR or mass spectrum) High pressure liquid chromatography , gas chromatogram Description of analytical methods or appropriate bibliographical references
Information on manufacture and use(s) of the substance
Overall manufacture quantities per calendar year Brief description of technological process used in manufacture/production of articles Form (substance, preparation, article) under which product is made available to downstream users Physical state under which product is made available to downstream users Concentration (range) of substance in preparations / articles made available to downstream users
Information on manufacture and use(s) of the substance
Brief general description of identified use(s) Waste quantities resulting from manufacture of substance, use in articles and identified uses Composition of waste from manufacture of substances, use in articles and identified uses Use(s) advised against
Classification & Labelling
Guidance on safe use concerning
First-aid measures Fire-fighting measures Accidental release measures Handling & Storage Transport information For quantities < 10 ton / year (no Chemical Safety Report) : Extra information Exposure controls / Personal Protection Stability & Reactivity Disposal Considerations Information on recycling and methods of disposal for industry Information on recycling and methods of disposal for public
Study summaries of the information derived from application of annexes VII-XI
Robust study summaries of the information derived from application of annexes VII- XI
Indication as to which the information has been reviewed by an assessor chosen by the manufacturer/importer
Proposals for testing where listed in annexes IX – X
If tonnage 1 – 10 ton : Extra information
Main use category : Industrial ; Professional ; Consumer Specification for industrial & professional use Closed system ; Resulting in inclusion or onto matrix ; Non-dispersive use ; Dispersive use Significant route(s) of exposure Human exposure (oral, dermal, inhalator) Environmental exposure (water, air, solid waste, soil) Pattern of exposure (accidental/infrequent, occasional, continuous/frequent)
Request as to which information should not be made available on the Internet
