Introduction

SGS Supplier Evaluation and Qualification Solutions (SEQS) provide robust, real-time and data driven supplier on-boarding with on-going risk analysis for long-term performance.

Global supply chains are under increasing pressure to satisfy customer requirements meaning supplier quality, operations, sustainability and safety are more important now than ever before. Products must be delivered on time and meet quality standards.

This means supporting the on-boarding of trusted suppliers, aligning corporate sustainability and safety goals, and ensuring transparency for better risk management.

Our Supplier Evaluation and Qualification Solutions offer a modular approach tailored to your specific needs.

It leverages technical experts to get real and actionable answers and combines interactive reporting, data analytics and bench-marking on a user-friendly digital platform. Its flexibility means it can easily be scaled-up, deployed quickly and re-positioned.

Ultimately it helps generate output for robust, balanced and systematic supplier improvement projects.
