CROP QUALITY MAPS
MAKING THE DIFFERENCE
INFORMATION YOU CAN TRUST
SGS delivers high quality crop data, following the harvest wave, collated and mapped by country and region, to give subscribers an accurate and up to date snapshot of grain quality before commodities reach transport hubs.

RUSSIA, UKRAINE AND KAZAKHSTAN

Accessible 24/7, quality maps for Russia, Ukraine and Kazakhstan and now form part our expanded Quality Monitoring database. In addition to the standard harvest quality data, this new service also delivers a range of export quality data.

Each year SGS analyses thousands of samples of new crops to provide customers with a clear understanding of crop quality, including data relating to:

- Protein (%)
- Moisture (%)
- Falling number sec
- Foreign material (%)
- Test weight (kg/hl)
- Oil content (%)

In all locations, our experienced inspectors follow the harvests and take samples directly from farmers’ locations/storage sites, thus giving subscribers information about quality per country or region.

EXAMPLE PROVIDED FOR WHEAT IN RUSSIA IN 2017

**WHEAT PROBES BY CLASS**

- Class 2: 1.8%
- Class 3: 33.3%
- Class 4: 43.6%
- Class 5: 21.3%

**WHEAT BUG DAMAGE CHART (%)**

- Orenburg: 1.9 Bug Damage
- Krasnodar: 1.3
- Volgograd: 1
- Voronezh: 0.5

SERBIA

In the Danube region, our interactive quality maps are accessed online and provide a full list of quality test results per product and a grade for each product and region.

FRANCE AND GERMANY

Grains and oilseed harvest mapping (GOHM) monitors the harvest in real time. Using data provided directly by farming operators into an online database, or collected by our team, our interactive maps show crop qualities and their development.

With superior information on crop quality, traders and primary processing operators can plan their purchases before crops are ready to export or process.

SGS FRANCE

Commodity package: oilseed rape, winter wheat, winter barley, durum wheat, spring barley, sunflower and corn
