SIGNIFICANT TESTS AT A GLANCE - INSTANT VIDEO ON YOUR SMARTPHONE

**DISHWASHING**
Cleaning performance

![Dishwashing Image](image1.png)

No residues on crockery! We offer the official IKW method for cleaning performance and newly developed consumer relevant soiling.

**DISHWASHING**
IKW plate test

![Dishwashing Image](image2.png)

With this official IKW Method, you are able to determine, how long a defined amount of your dishwasher liquid is able to last.

**SURFACE CARE**
IKW cleaning performance

![Surface Care Image](image3.png)

This test simulates the cleaning of a fat-dust soil, which is aged over an extended period of time.

**SURFACE CARE**
Lime scale removal

![Surface Care Image](image4.png)

Low-pH bathroom and toilet cleaning products need to clean and beat lime scale. Marble tiles are immersed into the product and precision weighing before and after testing accurately measures product efficacy.

**SURFACE CARE**
Soap scum removal

![Surface Care Image](image5.png)

Bathroom cleaning products must be able to clean up effectively. In soap scum removal tests soiled plates are soaked and the soaking time increased until >90% of scum is removed.

**SURFACE CARE**
Streak and drop formation

![Surface Care Image](image6.png)

No streaks! When clean is not enough – streak and drop formation testing for surface care products verifies performance. Five wipes on a mirror tile and left to dry, before visual evaluation.

**TOILET CARE**
Toilet rim block lifespan

![Toilet Image](image7.png)

Simulating real-life toilet flush cycles to identify and verify the life span of toilet rim block cleaning products.
