# SIGNIFICANT TESTS AT A GLANCE - INSTANT VIDEO ON YOUR SMARTPHONE

## BABY HYGIENE

### Absorption before leakage

No leaks! Meet the highest expectations for a diaper. We simulate night-time use, applying a specific sequence of dosages through mannequins until leakage occurs.

## FEMININE HYGIENE

### Simulation test

Security and confidence are major packaging claims in the femcare product area. This test, on mannequins, reflects product performance in anatomical usage conditions.

## ADULT INCONTINENCE

### Performance test

In this fast-growing sector, new designs and developments need rigorous testing to ensure products meet performance criteria and consumer needs.

## BABY HYGIENE

### Panda test

When performance testing is not enough, further expertise requires specific equipment and video. See what happens in realistic conditions.

## FEMININE HYGIENE

### Tampon syngina test

The performance of a tampon guarantees comfort and secure use. The Syngina Standard Test is recognised worldwide by professionals to limit the risk of extended use.

## TISSUE PAPER

### Dispersion time

An important household aspect of use. The flushability/dispersability is simulated through a vortex system.

## COTTON

### Pad absorbency

A cotton pad should receive any make up removal lotion without becoming completely damp. This test measures the absorption capacity, until the lotion pass through the cotton.
