

MINERALS ACCESS SHEET

GEOCHEMISTRY

Our market leading network of geochemistry labs is linked globally to provide an unparalleled suite of target elements. We also offer full services for check samples, MMI™ and on-site labs.

www.sgs.com/geochem

MMI™

Mobile Metal Ion (MMI™) is a proprietary SGS geochemical technology for finding mineral deposits. MMI™ is a cost effective, advanced surface exploration technique used to accurately locate deep mineral deposits.

METALLURGY

SGS has earned the reputation as market leader in bankable metallurgical testing in every commodity for scoping, pre-feasibility and feasibility testing and in-plant services.

www.sgs.com/metallurgy

GEOMETALLURGY

The SGS Geometallurgical Framework successfully integrates mineralogy and textural information with metallurgical liberation and selectivity parameters. Be among the first to put metallurgical data on your block model or mine plan and develop risk profiles!

TECHNICAL REPORTS

SGS geologists can act as Qualified Persons to prepare, review and audit technical reports compliant to NI 43-101 and JORC. We can also perform due diligence, property evaluations and pre-feasibility studies.

RESOURCE CALCULATIONS

SGS is a pioneer in resource estimation. Our experience ensures that your resource calculations are completed with the utmost accuracy and integrity.

www.sgs.com/mining/exploration

PROJECT MANAGEMENT

From initial planning and drill program management through to geological interpretation and resource modeling, SGS can provide you with geological consulting and exploration management services. As your trusted partner, we can provide turnkey professional services or act as a technical advisor.

MINERALOGY

Our automated, instrumented mineralogy capability allows SGS to provide cutting-edge High Definition Mineralogy. Our comprehensive Advanced Mineralogy Facilities can help with detailed characterizations.

www.sgs.com/mining/mineralogy

GEOTECHNICAL SERVICES

SGS offers a broad suite of geotechnical testing for the mining industry and governments. Take advantage of our expertise and experience and solve specific challenges at your site.

www.sgs.com/mining/geotechnical

ADVANCED SYSTEMS

SGS is a recognized leader in the development and integration of turnkey advanced control solutions. We can help you take advantage of the proven benefits of advanced control via the implementation of an expert system, scheduling, simulation or optimization.

www.sgs.com/advanced-systems

PRODUCTION OPTIMIZATION

SGS can help decrease risk and increase bankability. We offer production optimization contracts and preproduction/prestart-up, with the commencement of mining and during any year of production.

SUSTAINABLE DEVELOPMENT

Unite the testing and technical strengths of SGS with the stringent needs of the mining industry and the environmental community. We can deliver in:

- Acid rock drainage testing and mitigation
- Waste characterization
- Water and effluent treatment

www.sgs.com/mining/sustainability

IN-PLANT SERVICES

SGS provides world-class technical support to ensure constant optimal mill throughput and metallurgy. We support on-site operations with:

- Periodic technical auditing
- Trouble-shooting
- Complete on-site daily metallurgical management

SOCIAL RESPONSIBILITY

Certifying your management systems against SA 8000 through SGS will help your organization develop and improve social accountability.

www.sgs.com/mining/social

MINE CLOSURE & RECLAMATION

SGS has a rare blend of people with practical mining, geological and geotechnical experience, world-renowned theoretical knowledge and the latest computer and software technology. We are available worldwide to assist you with your reclamation and closure concerns.
