ADDS UP
Understanding the downhole flow dynamics of your well is crucial for maintaining the best controls for maximum recovery. SGS Cased Hole Services offers you accurate and trusted measurements to diagnose, analyse and reduce risk during the production of oil and natural gas. From onshore to offshore fields, our experts deliver initial production profiling through to well integrity and mechanical services. Partner with SGS today and maximise production for the future life of your well.

ABOUT SGS CASED HOLE SERVICES
SGS Cased Hole Services employs state-of-the-art production and well logging tools that use multisensor testing techniques. These reduce flow interference, rig up height, and the need for ancillary equipment for conveyance. This minimises your risks and the non-productive time of your well. With multi-sensor testing, our experts ensure you receive maximum data and results from a single run, viewable in real-time or via data transfer, including: accurate data on standing water, crossflow, injection breakthrough, scaling, and productivity index (PI) measurements.

SLICKLINE SERVICES
- Plug Setting
- Downhole Sampling
- Setting/Pulling Gas Lift Valves
- Gauge Surveys
- Fishing
- Memory Logging
- Mechanical Services

E-LINE SERVICES
- Production Logging
- Well integrity – Downhole Casing Inspection (SRO and Memory)
- Cement Bond Logging
- RCT Cutting Services
- Perforating Services (SRO and Memory)
- Plug Setting (Explosive and Non-Explosive)
- Downhole Video
- Reservoir Monitoring – Pulsed Neutron Logging (SRO and Memory)

SGS ADDS UP
SGS is the world’s leading inspection, verification, testing and certification company. Recognised as the global benchmark for quality and integrity, we employ over 85,000 people and operate a network of more than 1,800 offices and laboratories around the world. We are constantly looking beyond customers’ and society’s expectations in order to deliver market-leading services wherever they are needed.

We have a history of undertaking and successfully executing large-scale, complex international projects. With a presence in every single region around the globe, our people speak the language and understand the culture of the local market and operate globally in a consistent, reliable and effective manner.

We provide innovative services and solutions for every part of the oil, gas and chemicals industry. Our global network of offices and laboratories, alongside our dedicated team, allows us to respond to your needs, when and where they occur. Our reputation for independence, excellence and innovation has established us as the market leader in providing services that improve efficiency, reduce risk and deliver competitive advantage for you.
