

OFFSHORE ENERGY EXPERTISE AND **CONTRACT RECRUITMENT** SUPPORT TO DELIVER YOUR PROJECT

ISSUED – MARCH 2017

SGS TECHNICAL STAFFING SERVICES – FINDING THE RIGHT PEOPLE FOR DONG ENERGY

In April 2015, DONG Energy commenced with the construction of the offshore wind farms Gode Wind 1 and Gode Wind 2 in the North Sea. According to the Danish energy group, Germany's largest offshore wind farm shall supply 600,000 households per year with green energy in the future. To ensure that the project could go on line in 2016 with an output of 582 megawatts, high-skilled technical personnel were temporarily required depending on the construction phase. To cover the increased personnel requirements within the project phases, some of which are short term, DONG Energy used SGS technical staffing services.

ABOUT THE DONG PROJECT

Dong Energy signed a framework agreement with the SGS technical staffing team in Germany in July 2015 to supply offshore engineers to its wind farms in various locations around Europe.

We began by allocating a dedicated consultant and committed to filling their roles within the allocated timeframe. A strategic sourcing and headhunting technique was used to generate a pool of engineers for Dong in the primary regions for the projects. By using our extensive network to identify and engage a pool of candidates we were able to deliver ahead of time and stay one step ahead which helped Dong to better forecast hires.

Candidates found include SCADA Engineers, Control Engineers, Commissioning Engineers, HSE services and Offshore personnel.

PREFERRED SUPPLIER UNTIL 2020

DONG Energy has a framework contract with SGS for the provision of experts for the construction & installation of offshore wind farms until 2020.

WHY SGS?

A flexible, skilled workforce is the key to success in business. Contract employees thrive on the challenges and variety of placements this type of working offers and can be a cost-effective asset to your business.

Contractor recruitment volumes can range from single placements to teams of multi-discipline engineers. SGS can accommodate mass recruitment for the most ambitious timescales by adopting a flexible approach including;

- Dedicated assignment support for contract employees
- Contract to permanent placements
- Local, international recruitment and relocation
- Contractor management
