MANAGE THE COMPLEXITY OF INDUSTRIAL PROJECTS

TAILORED SOLUTIONS
SGS offers you a comprehensive solution package to help you meet applicable requirements, whether they are regulatory, voluntary or client based. This applies for technical investments and projects and could be with contractual as well as with technical aspects. In any case, we will add value to your project.

OUR SERVICES
All audits, inspections, conformity checks and additional services executed by SGS will be performed according to the contract, to your norms and specifications or according to national and international regulations and standards. Communicating with one only contact you benefit from our world wide network of qualified experts when you need inspections and surveillance in various countries.

Every project has its specific characteristics and all our clients have different needs. This necessitates the presentation and defining of our services to the specific technical and legislative needs of our clients.
