

4 INDUSTRIES

AEROSPACE, AUTOMOTIVE, MARINE & RAIL

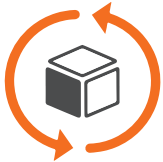

# SGS TRANSPORTATION SERVICES

# BIG DATA AND THE INTERNET OF THINGS PAVE THE WAY FOR TRULY INTEGRATED AND INTERMODAL TRANSPORT SOLUTIONS

Evolving the Automotive division into a Transportation division unlocks the potential for substantial growth. The global transportation market is set to expand. A major part of that growth will concern emerging economies with megacities increasing in number and size.

SGS provides complete solutions to the supply chain and our clients will benefit from a combination of our service offerings in each Industry Sector.

## 4 SERVICES ACROSS 4 INDUSTRIES

### FIELD SERVICES

Independent and trustworthy, our field services help companies detect and fix issues and potential risks in the field. Solid information and flexible on-site execution ensure business opportunities and growth, and deliver added value that can be monetized within supply chains, retail networks and asset management across all four industries.

### TESTING SERVICES

From raw materials to mechanical and electronic components, computer control systems and mechanical subassemblies, we offer testing services to ensure safety, reliability, performance and compliance with international standards and regulations, with manufacturer and operator standards.

### REGULATED SERVICES

SGS is uniquely qualified and holds the accreditations to perform inspections for safety, emissions and comfort at regular intervals in accordance with the legislation in force, as well as supporting customers in all phases of the homologation process for diverse market requirements. Our regulated services operate worldwide with a focus on the automotive industry sector.

### ITS SERVICES

With the increase in safety concerns, traffic congestion, and environmental factors brought on by the continued growth in vehicle population, it has become more important to rely on Intelligent Transport Systems (ITS) to lead the way to safer, more efficient, and environmentally friendly foundations for economic development.

The combination of our extensive experience in the transport industry, big data and data analytics solutions, and operation of intelligent transport systems produce impactful results for our clients worldwide.

### WHY SGS ?

SGS is the world's leading inspection, verification, testing and certification company. SGS is recognized as the global benchmark for quality and integrity. With more than 85,000 employees, SGS operates a network of over 1,800 offices and laboratories worldwide. SGS will be able to immediately use its existing technical resource infrastructure for all those services.
