

# SGSMART: Supply Chain Knowledge Sharing

SGSmart, our online tool, continues to improve. We have developed a new feature 'Supply Chain Knowledge Sharing' to provide you immediate technical support without limitation of where you work from and when are work. It is a 24/7 online global technical competence application. So you are not just having a total transparency of your quality supply chain with analytics, and we are sharing our professional knowledge and intelligence just Infront of your desk.

Quality means Trusted. Supply Chain Knowledge Sharing reinforces this concept by enabling you to better manage your supply chain and share knowledge across your suppliers.

Four core modules facilitate global product safety and environmental compliances, help you to rapidly analyse recalls data, keep you updated with the global apparel industry trend and update and enable you to select China product standards via a few clicks.

## 1. SUPPLY CHAIN TOOLKIT

This interactive technical knowledge platform specializes in chemical management and risk reduction across the supply chain. Users will benefit from:

- Improved understanding of international regulatory requirements for product safety, wastewater, and sludge
- Enhanced understanding of chemical awareness and the safe use of chemicals
- Knowledge for establishing an effective chemical control system
- Reduced product safety risk
- Enhanced brand image and competitiveness

## 2. RECALL CASES ANALYSIS

An interactive analysis for recall cases in major markets, this module visualizes recall risk in defined quality/restricted substance parameters, country, product, and/or time period.

## 3. CHINA PRODUCT STANDARD SELECTION TOOL

This tool guides you to select the China product standard relevant to your product(s).

## 4. INDUSTRY HIGHLIGHTS

A holistic and strategic update on the latest global regulatory requirements, upcoming events, insights into new trends and the latest movement of industrial associations.

## WHAT IS SGSMART?

SGSmart is a customizable online tool that allows you to set up a profile based on your needs. It delivers:

- Supply chain transparency
- Global accessibility
- Supplier co-creations on workflow
- Management focus on cost & time
- Agile problem solving
- Responses to market
- Tailor-made supply chain's preferences and needs
