SGS BRAZIL FEATURES

SGS Brazil has the first chemical lab in Brazil to test for Restricted Substances according to international standards for Textiles, Footwear and Toys. The lab also has the widest testing scope for Food Contact materials. Our facilities incorporates distinct laboratories, that perform the following types of testing:

- Chemical Testing
- Microbiological Testing
- Physical Performance Testing
- Electrical Efficiency Safety

SGS Brazil laboratories have the following accreditations:

- ISO/IEC 17025
- CPSC

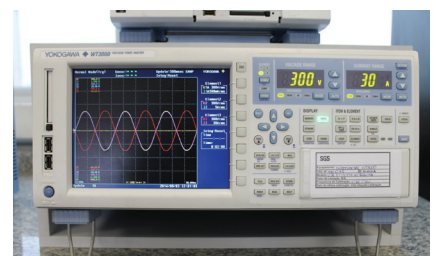

SGS Brazil employs a wide range of experts as well as customer service staff, sales managers and key account managers. Our laboratories became a Local Competence Centre for Chemical testing and technical support.
