

RUSSIA

EXPRESS TESTING FACILITIES

In Russia our GAFTA accredited laboratories are expanding their testing services and their equipment. This includes newly installed facilities for the express testing of sunflower seed and meal.

To complement our expansion, and the growing demand for testing services, there has also been heavy investment in our staff training programme. Everyone from the back office, to our experts in the field has been involved.

With a presence in every port of loading, SGS Vostok understands the importance of timely quality and quantity verification. We are experienced in the loading and unloading of sea going vessels to barges. A dedicated, qualified team oversees this process and ensures that quality assessments are carried out immediately. To meet the growing demand for this service we also have 13 mobile laboratories, as well as express laboratories in every loading port.

Trust in our expertise, to ensure the smooth progress of your supply chain and ensure there are no certification issues. We work closely with customers and conduct preliminary consulting services, to check feasibility, free of charge.

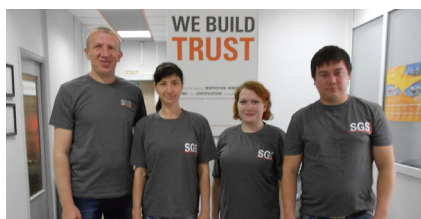

NOVOROSSIYSK TEAM

Miheev Gennadiy	Senior Inspector	miheev.gennadiy@sgs.com
Denis Frolov	Operations Coordinator	denis.frolov@sgs.com
