

GUARANTEE SERVICES

LEAVE NOTHING TO CHANCE

Transportation of commodities is a constant and challenging activity. Physical movement of goods can give rise to many different risks including quantity and quality issues and even possible rejection. These risks cannot be fully anticipated or controlled and the resulting damage can be extreme. SGS has developed a comprehensive portfolio of Guarantee Services to eliminate various risk elements and provide peace of mind to our international customers.

Our services include:

- Full Outturn Guarantee (FOG)
- Comprehensive Cover (CC)
- Full Outturn Quality (FOQ)
- Seller's interest / Contingency
- Fumigation Guarantee
- Financial Loss Cover (in case of piracy)
- Mycotoxin Cover
- Customised services

To find out more about our services and request a quotation, please contact:

QUALITY MAPS

INFORMATION YOU CAN TRUST

Every year SGS performs analyses of thousands of samples of new crops to provide customers with a clear understanding of crop quality.

Our experienced inspectors follow the harvest wave and take samples directly from the farmers' locations/storage sites, thus giving our subscribers information about quality per country or region, long before the grains are in port.

HOW TO SUBSCRIBE

To subscribe, please contact your regional sales manager (details below). Once payment is confirmed, you will receive a subscription code and password to access our internet platform.

HOW TO ACCESS DATA

Our customers are updated via an interactive map. Click on your chosen region to find a full list of quality test results per product (max., min. and average) and a grade for each product and region.
