

# ASSESSMENT OF THE EFFECTS OF WIND FARMS ON AVIATION OPERATIONS

JANUARY 2017

## AUTHOR

Mel Dunn  
Senior Aviation Advisor  
SGS HART Aviation

# ABSTRACT

The purpose of this document is to provide information and analysis on the interactions between wind farm developments and aviation safety. This document is not intended to provide recommendations on all of the issues relating to how wind farm developments affect aviation interests, and vice versa. Rather, it aims to introduce and promote understanding of the potential risks wind farms may impose on aviation operations and the need, or otherwise, for specific mitigation measures

# CONTENTS

- I – Background ..... 3
- II – International Regulations ..... 3
- III – Potential Risks to Aviation..... 4
- IV – Mitigating Measures..... 5
- V – Issues ..... 5
- VI – Conclusion ..... 6
