PACKAGING INNOVATIONS AND THEIR IMPACT ON FOOD SAFETY CERTIFICATION

DISCUSSION ON FOOD PACKAGING CHALLENGES, TRENDS AND INNOVATIONS AND THEIR RELEVANCE FOR ORGANISATIONS CONSIDERING GLOBAL FOOD SAFETY INITIATIVE (GFSI) CERTIFICATION

JUNE 2014

AUTHORS
DR EVANGELIA KOMITOPOULOU
Global Technical Manager for Food, SGS

NEIL MILVAIN
Global Product Manager for Packaging, SGS
ABSTRACT

This document aims to provide an insight into Global Food Safety Initiative (GFSI) certification schemes. It is not intended to be a full explanation of the schemes, rather it provides an understanding of the standards and their benefits. This report gives focus to the quality management system standards required for the safety of food packaging suitable for organisations doing business at a domestic or international level within the food industry.

CONTENTS

I. EXECUTIVE SUMMARY ................................................................. 2
II. GFSI APPROVED STANDARDS .................................................... 3
III. INDUSTRY CHALLENGES: COMMON NON-CONFORMITIES ........ 5
IV. INDUSTRY TRENDS AND PACKAGING INNOVATION DRIVERS ... 6
V. PACKAGING FUNCTIONALITY ....................................................... 7
VI. PACKAGING INNOVATIONS .......................................................... 8
VII. CONCLUSIONS ................................................................. 11
VIII. FUTURE TRENDS ................................................................. 11
IX. REFERENCES ........................................................................ 12
