

# ARGUS PROS

ARGUS PROS Air Carrier experts provide the most powerful tools and resources available to optimize your operations.

Regardless of the size of your operation, ARGUS can work with you to design an audit to meet your specific needs. We offer safety, operational, and air crew audit solutions, in addition to the several other audit disciplines we can perform.

The PROS Support Program is a subscription service offered to Operators to make the IOSA process more efficient and less intrusive. The services are based on PROS' vast experience working with the IOSA program.

Create a benchmark for your organizations internal safety program and create opportunity to grow market share through conduct of the ARGUS PROS Code Share Audit. Code Share audits are conducted against all applicable ICAO SARPs from Annexes 1, 2, 6(PI), 8, 17, 18 & 19.

Gap Assessments are internal reviews that evaluate an airline's documentation and implementation against key audit frameworks such as Code Share, IOSA, ISSA, or custom requirements. These assessments help operators identify gaps early, streamline audit preparation, and ensure alignment with industry standards.

## Training

ARGUS offers the most comprehensive airline safety and auditor training, taught by the most experienced professionals. Join our scheduled virtual training sessions or book one of our instructors to come to your headquarters for an in person event.

## Regulatory Certification Services

ARGUS experts develop and customize manuals for startup and mature operators of various sizes around the world. Take advantage of the most powerful tools and resources available to certify and optimize your operations.

# Airline Safety Training

ARGUS PROS training courses include IOSA Conformance Auditor Training (ICAT), Risk Based IOSA (RBI), Airlines Safety Management System (ASMS) and Aviation Lead Auditor Training (ALAT).

## IOSA Conformance Auditor Training

ARGUS PROS offers On-Site or Virtual ICAT training. ICAT is dedicated to the education of operational managers, staff, and auditors. It focuses on the IOSA requirements for internal auditors.

## Recurrent IOSA Conformance Auditor Training

Train with instructors that have real world experience with Safety Management. SMS Training from ARGUS provides the knowledge you need to implement an effective Safety Management System in your aviation operation.

## Risk Based IOSA Training

Risk-Based IOSA (RBI) Training focuses on safety risks specific to the auditee and organization. RBI can increase the effectiveness of an audit and contributes to the overall industry goal of reducing accident rates.

## Airline SMS Training

This course provides aviation professionals with in-depth knowledge of Safety Management Systems (SMS) related to the ISARPs. The course is aligned with ICAO Annex 19 and IOSA Standards and Recommended Practices.

## Aviation Lead Auditor Training

Aviation Lead Auditor training gives you the pertinent knowledge and practical tools necessary to conduct aviation audits, including internal, external, third party, and airline codeshare.

## Custom Training

Customize your on-site course to cover just what your operation requires. ARGUS experts come to you and can train your entire operation, or one safety manager. ARGUS can conduct on-site courses to meet your operation's needs.
