ARGUS products are here to guide you with safety.

ARG/US[®]

PRISM

PRISM offers the aviation industry's most comprehensive line of system management services, including support for Safety, Security, Quality and Environmental Management Systems.

The ARGUS Ratings system represents the highest level of quality in aviation. Earning an ARGUS Charter Operator Rating demonstrates your adherence to an internationally recognized standard.

ARG/US[®]

pros

PROS is the worldwide leader in on-site safety audits, providing audits worldwide for Fixed Wing Operators, Brokers, Helicopter Operators, and FBOs. PROS is also a training resource for individuals interested in becoming auditors.

PRISM SMS is more than just a software subscription. It's a partnership in safety management systems. PRISM SMS users get access to ARGUS Safety Performance Indicators, Risk Management, and ARGUS Safety IQ.

pros
Support Program

The PROS Support Program is a subscription service offered to Operators to make the IOSA process more efficient and less intrusive. The services are based on PROS vast experience working with the IOSA program.

ARG/US[®]

Certifications & Assessments

ARGUS Experts perform, assist or advise on your Regulatory & Safety Assessments, Technical Asset Management, Part 121, 125, 129 or 135 Certification Projects, Due Diligence, Market Analysis, Operational Benchmarking and Optimization Strategies.

✓^x TripCHEQ

TripCHEQ software offers you minute by minute information on upcoming departures and arrivals. TripCHEQ classifies flight profiles into three designated risk categories to show you how to improve your operations.

CHEQ ✓

When you subscribe to the CHEQ system, you're gaining access to a database that displays all the operators who possess an ARGUS rating. The CHEQ database is an industry-grade platform that showcases over 500 operators all in one place.

ARGUS Analytics gives you access to our team of data analysts. Simply tell our aviation experts what kind of information would be valuable to your business and you will receive a custom TRAQPak report.

TRAQPak's flight tracking software and robust database provide information important to numerous types of aviation businesses. Choose the flight tracking software subscription that fits your needs.

ARGUS' ClearView is an Aircraft Operations Analysis and Benchmarking tool used to analyze the current and historical trends of aircraft activity, and to make better and more efficient planning decisions.
