SGS AI Trust Check

QUICKLY ASSESS THE TRUSTWORTHINESS AND COMPLIANCE OF YOUR AI SYSTEMS

WHAT IS SGS AI TRUST CHECK

As AI has grown in popularity, concerns about risks to users and the general public have led to the development of a range of regulations and standards designed to ensure that AI is being used responsibly. SGS AI Trust Check is an online self-assessment tool designed to help you evaluate how well your AI systems align with the latest regulations and industry best practices. In just 15 to 30 minutes, you will gain valuable insights into your organization's AI governance, compliance readiness and risk management maturity.

Whether you are preparing for the European Union Artificial Intelligence (EU AI) Act, implementing the ISO/IEC 42001 Artificial Intelligence Management System standard or aligning with the National Institute of Standards and Technology (NIST) AI Risk Management Framework, this interactive tool gives you a fast, structured way to understand where you stand and how we can help you move forward.

HOW IT WORKS

SGS AI Trust Check uses structured questions to assess key aspects of responsible AI, including the system's profile, data use and autonomy, governance and oversight, risk and incident management, and supplier and lifecycle accountability.

WHAT YOU WILL GET?

After completing the self-assessment, you will instantly receive:

- A personalized summary report showing your current AI governance and compliance maturity
- A list of priority recommendations and relevant international standards
- Tailored suggestions for SGS Digital Trust services that can strengthen your readiness and build stakeholder trust

Get started now: **sgs.com/SGS-AI-Trust-Check**

KEY BENEFITS

- Save time while working towards AI compliance
- Meet internationally recognized AI standards
- Build a roadmap for continuous improvement
- Create trust within your organization and among stakeholders

WHO SHOULD USE THIS TOOL

- AI developers and technology providers seeking to demonstrate compliance and responsible design
- Business leaders and compliance managers preparing for new AI governance requirements
- Data protection officers and risk managers assessing AI-related risks and accountability mechanisms
- Procurement and supply chain teams evaluating AI components, vendors and third-party tools
- Public and private sector organizations aiming to build trust and transparency into their AI operations

NEXT STEPS WITH SGS

Your self-assessment is just the beginning. Once your responses are submitted, our AI experts may further analyze your results, and our representative may reach out to:

- Discuss your findings and provide a deeper interpretation of your readiness report
- Identify assurance or certification pathways, such as pre-assessments, audits or ISO/IEC 42001 certification
- Support your compliance roadmap through training, gap assessments, governance reviews or AI assurance services

We support your journey toward robust and transparent AI governance, ensuring your systems remain compliant, ethical and trusted by users, partners and regulators.

WHY SGS?

As the world's leading testing, inspection and certification company, we combine vast knowledge of AI and cybersecurity with extensive global expertise in regulatory compliance. We will help you reduce risk while benefiting from the latest digital technology.
