

ALUMINUM STEWARDSHIP INITIATIVE (ASI) CERTIFICATION

What is the ASI?

The ASI is a global, not-for-profit standards-setting and certification organization. It unites aluminum value chain producers, users and stakeholders to maximize the metal's contribution to a sustainable society.

What we offer

As the world's leading certification, testing, verification and inspection company, we provide in-depth expertise in ASI certification requirements. We offer comprehensive, transparent ASI certification for the performance standard (PS) and chain of custody (COC) standard.

Our performance service covers:

- Bauxite mining
- Alumina refining
- Aluminum smelting
- Casthouses
- Semi-fabrication
- Aluminum re-melting/refining
- Material conversion
- Other manufacturing and sale of products containing aluminum

Our chain of custody service covers:

- Bauxite mining
- Alumina refining
- Post-casthouse, including semi-fabricators, material conversion and other manufacturing and sale of products containing aluminum

Our global, multi-disciplinary network of experts can help you ensure that your practices align with the ASI requirements.

Who is it for?

Any producers, users and stakeholders in the aluminum value chain that want to maximize the metal's contribution to a sustainable society.

Key benefits

We enable you to:

- Ensure that your practices align with ASI requirements
- Certify your operation against ASI requirements
- Gain a competitive edge
- Foster responsible aluminum production, sourcing and stewardship
- Demonstrate to stakeholders and consumers that you are committed to aluminum best practices throughout your supply chain

Contribute to more sustainable aluminum
