

## **HOLISTIC SOLUTIONS FOR QUALITY, SAFETY AND SUSTAINABILITY IN TEXTILES, FOOTWEAR AND LEATHER PRODUCTS**

The textile and footwear industry faces growing pressures across the value chain. Governments, consumers and stakeholders increasingly demand more than compliance – they expect products that are safe, ethically produced and designed with sustainability embedded at every stage. To succeed in today's competitive markets, companies must address challenges such as climate change, pollution, product safety and health risks, while meeting evolving regulations and complex supply chain requirements.

We help brands and retailers navigate these challenges with confidence. From raw materials to finished products, our expertise allows you to deliver style, fit, value, durability, ease of care and performance, all while achieving ambitious sustainability targets. By transforming regulatory requirements into opportunities for innovation, we empower you to create products that excel in the market and contribute to a more sustainable future.

## TRUSTED SOLUTIONS FOR SOFTLINES

With an extensive global network of offices and state-of-the-art testing facilities, SGS is a trusted partner to leading brands and retailers across the textile and footwear industries.

Our deep industry expertise enables us to design customized service programs that align with your specific business goals, regulatory requirements, and sustainability commitments.

### TESTING and ASSESSMENT

We provide a full range of testing services for finished products, materials and/or components based on defined standards, regulations and your performance requirements:

- Chemical / Restricted Substances Testing (e.g. EU REACH, CA prop 65, US CPSIA, Chemical Screening, MRSI)
- Performance advancement (comfort and wellness assessment functional testing)
- Physical testing eg. pilling, colorfastness, fiber composition etc.
- Wastewater Testing: ZDHC and Detox programs
- Fiber composition and labelling
- Flammability
- Fiber fragmentation
- Personal protective equipment (PPE) testing

### SUSTAINABILITY

Our global network of sustainability experts will support your company in its strategy by offering a range of services covering the environmental, safety and social aspects of sustainability:

- Better chemicals: bluesign, chemical solution, chemical management.
- Process sustainability: waste emission management, resource efficiency improvement
- Product Sustainability: preferred materials verification, durability, circularity, traceability, eco-design, Digital Product Passport
- Carbon solutions: decarbonization, LCA, PEF, PCF
- Best available practices: best practices implementation and improvement services

### INSPECTION

Our inspection services ensure product compliance at every stage of production:

- Initial production check (IPC)
- During production check (DUPRO)
- Final random inspection (FRI)
- FOOTS+ and GOODS+
- Remote inspection
- Warehouse risk assessment

### CERTIFICATION

We provide the textile and footwear industry with certification solutions against a variety of industry initiatives, national and international standards including:

- Textile exchange (GRS, RCS, OCS, RDS, RWS and RAS)
