

Connectivity & Products

INSPECTION, TECHNICAL SERVICES AND TRAININGS

We offer a wide range of services to the industries, at every stage of the value chain. We help to ensure the quality, safety and sustainability of all the relevant products and their mode of distribution to satisfy regulatory requirements as well as the demands of the market.

Independent inspection of the products at various stages of the product's life cycle ensures that the quality of mass production matches that of samples verified and helps you to identify critical defects before product hits the market.

INSPECTION SERVICES

PRE-SHIPMENT INSPECTION SERVICES

- **PPC – Pre-Production Check**
It ensures that material, component, label specification, user manual, and other important parameters are checked before processing and to eliminate the risk of non-compliance to product specification due to poor planning and/or use of sub-standard materials and/or inadequate manufacturing processes
- **IPC – Initial Production Check**
It is conducted at an early stage of production when the first batch of product has been produced, to ascertain conformity to basic product specification

- **DUPRO – During Production**
It is conducted when 30 – 50% of the total order quantity is available in boxes to ascertain that initial discrepancies have been rectified and to check that product quality meets the required specifications
- **FRI – Final Random Inspection**
It is the statistical, visual inspection at the end of production before shipment, in principle when 100% is produced
- **LS – Loading Supervision**
This service ensures that the inspected and released consignment is shipped without tampering to the buyer
- **II – Informative Self Inspection**
In this service, inspection is being conducted on the request of local manufacturers/exporters to assess their quality before offering the same to their international buyers in accordance to international inspection standards

MAN-MONTH INSPECTION SERVICES

In this service team experts are deputed at the factory in order to perform a thorough inspection/quality assessment as per the mentioned customer(s) on monthly basis. Inspection findings along with photographs and graphical representations are shared/ presented to the top management of the company on daily basis, weekly basis, and at the end of the month.
