

SGS TrustMark Product Certification

INDEPENDENT ASSURANCE FOR PRODUCT QUALITY SAFETY AND ONGOING COMPLIANCE IN AUSTRALIA

Build market confidence with independent third-party product certification. SGS TrustMark combines product testing, factory assessment and ongoing surveillance to help manufacturers, importers, suppliers and brand owners demonstrate conformity with applicable Australian, New Zealand and international standards.

Certification is available for:

- Personal protective equipment
- Fire protection products
- Specialised plumbing and gas products
- Specialised electrical and electronic equipment
- Structural steelwork
- Construction products

SGS

BUILD YOUR PRODUCT CONFIDENCE

Meeting a standard is about more than passing a test. Manufacturers, importers, suppliers and brand owners also need confidence that products are manufactured consistently and continue to meet applicable requirements.

The SGS TrustMark Product Certification Scheme combines product testing, factory assessment, independent certification review and ongoing surveillance. It provides objective evidence that certified products conform to the standard identified within the approved certification scope.

WHAT SGS TRUSTMARK CAN HELP YOU DEMONSTRATE

- Product conformity with the standard specified on the certificate
- Consistent production controls at the manufacturing site
- Ongoing conformity through annual surveillance
- Independent third-party assurance for customers and supply chain partners
- A stronger basis for procurement, project and tender discussions where certification is requested

A PRACTICAL CERTIFICATION PATHWAY

SGS TrustMark is a voluntary product certification scheme operated by SGS Australia Pty Ltd. Its certification process closely aligns with Scheme Type 5 as described in ISO/IEC 17067.

This approach evaluates both the product and the production control system. It then uses ongoing surveillance to support continued conformity.

In Australia, recognised standards may be an industry expectation, a customer or supply chain requirement, or a legal requirement for specific products. Certification does not replace your responsibility to meet all applicable legal and regulatory obligations.

MORE THAN A ONE-OFF TEST

Product testing assesses whether submitted samples meet the nominated standard at a particular point in time. Product certification goes further.

SGS TrustMark also assesses the controls used to manufacture the product. This helps determine whether certified products can continue to be produced consistently and in accordance with the approved specification.

The certification process includes:

- Application and scope review
- Initial product testing
- Factory assessment
- Independent technical review
- Certification decision
- Certificate issuance
- Annual surveillance
- Five-year renewal

WHO THE SCHEME SUPPORTS

SGS TrustMark is designed for:

- Australian and international manufacturers
- Importers and distributors
- Product suppliers
- Brand owners
- Procurement and project teams seeking independent assurance

ONGOING ASSURANCE

Certificates are issued with a five-year validity period, subject to annual surveillance and continued conformity with certification requirements.

Annual surveillance audits assess whether the production control system remains effective. Any identified nonconformities must be addressed to maintain certification.

TRUSTMARK PLUS+

TrustMark Plus+ provides an additional level of ongoing assurance by including annual audit testing of product samples alongside the annual surveillance audit.

WHY INDEPENDENT CERTIFICATION MATTERS

Regulatory expectations, customer requirements and supply chain scrutiny continue to increase. Businesses need credible evidence that products meet applicable requirements and are supported by effective manufacturing controls.

Independent product certification can help:

- Strengthen customer and supply chain confidence
- Support acceptance in projects and tenders
- Demonstrate due diligence
- Differentiate certified products
- Reduce uncertainty within complex supply chains
- Support continued conformity over time

USE THE SGS TRUSTMARK WITH CONFIDENCE

Once certification is granted, certified organisations may apply the SGS TrustMark to approved products, packaging, technical documentation and marketing materials in accordance with the scheme rules. The mark provides customers, regulators and supply chain partners with a clear and recognisable sign of independent third-party certification.

START WITH THE RIGHT CERTIFICATION PATHWAY

Tell us about your product, intended market and applicable standard. Our Australian product certification team can help confirm whether your product is covered and explain the testing, documentation and factory assessment requirements.

Standards covered by SGS TrustMark

PERSONAL PROTECTION

Protective equipment is expected to perform when risk is highest. SGS TrustMark combines product testing, factory assessment, independent certification review and ongoing surveillance to provide greater confidence in continued conformity.

EYE PROTECTION

- AS/NZS 1337.1
- AS/NZS 1337.2
- AS/NZS 1337.5
- AS/NZS 1337.6
- AS 16321.1
- AS 16321.2
- AS/NZS 18527.1

the impact, optical or specialist protection requirements of the nominated standard.

HEARING PROTECTION

- AS/NZS 1270

Independent certification supports confidence that hearing protectors meet the acoustic performance, information and marking requirements of the nominated standard.

PROTECTIVE HELMETS

- AS/NZS 2063
- AS/NZS 1801
- AS 4067
- EN 1078

For workplace, cycling and firefighting applications, certification provides objective evidence against product-specific safety and performance requirements.

FALL ARREST

- AS/NZS 1891.1
- AS/NZS 1891.3
- AS/NZS 1891.5
- AS 5532

For equipment used at height, consistent manufacture is critical. SGS TrustMark helps suppliers demonstrate ongoing conformity with the certified standard.

SAFETY FOOTWEAR

- AS 2210.3
- AS 2210.5
- ISO 20345
- ASTM F2413

Certification helps demonstrate that protective footwear meets the safety, construction and performance requirements of the nominated standard.

PROTECTIVE GLOVES

- AS/NZS 2161.3
- EN 388

Independent certification helps buyers and users identify protective gloves assessed against recognised mechanical protection requirements.

Standards covered by SGS TrustMark

SAFETY AND EMERGENCY RESPONSE

From respiratory protection to firefighting equipment, product performance can directly affect people and property. Independent certification helps manufacturers and suppliers demonstrate conformity and maintain confidence across the supply chain.

CHILD RESTRAINTS

- AS/NZS 1754

SGS TrustMark provides independent assurance that certified child restraints have been assessed against the applicable product safety and manufacturing requirements.

RESPIRATORY DEVICES

- AS/NZS 1716

Certification of respiratory protective devices provides objective evidence of product conformity and ongoing control of the manufacturing process.

PROTECTIVE CLOTHING

- AS 4967
- AS/NZS 4824
- AS 4602.1
- AS/NZS 4602.2

Independent certification supports confidence in protective clothing intended for demanding firefighting and emergency response environments.

FIRE EXTINGUISHERS

- AS/NZS 1841.2
- AS/NZS 1841.3
- AS/NZS 1841.4
- AS/NZS 1841.5
- AS/NZS 1841.6
- AS/NZS 4265

SGS TrustMark helps demonstrate that certified portable fire extinguishers conform to the requirements of the nominated product standard.

FIRE BLANKETS

- AS 3504
- DIN SPEC 91489

Certification supports confidence that fire blankets are assessed against recognised requirements for construction, performance and product information.

ALCOHOL TESTERS

- AS 3547.1
- AS 3547.2
- AS 3547.3

Independent certification helps demonstrate that alcohol testing devices meet the performance requirements applicable to their intended use.

SGS

Standards covered by SGS TrustMark

PLUMBING AND BUILDING SYSTEMS

Product conformity supports reliable building services and stronger procurement decisions. SGS TrustMark combines technical assessment with surveillance of production controls to help demonstrate continued compliance.

PLASTIC PIPING

- AS 4176.8
- AS/NZS 4130
- AS/NZS 4129
- AS/NZS 1260

Certification helps manufacturers and suppliers demonstrate conformity for plastic piping products used across water, drainage and related systems.

MANUAL VALVES & METALLIC FITTINGS

- AS 4617
- AS 3688

SGS TrustMark provides independent assurance that certified manual valves and metallic fittings conform to applicable standards, supporting confidence in products used across water service and plumbing applications.

GAS CARTRIDGES

- EN 417

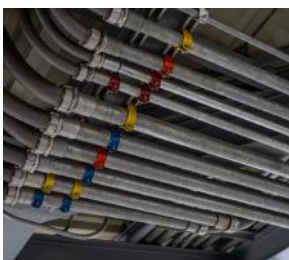

Certification supports confidence that non-refillable metallic gas cartridges, with or without valves, meet applicable construction, inspection, testing and marking requirements for use with liquefied petroleum gas portable appliances.

HEAT PUMP WATER HEATERS

- AS/NZS 2712

Independent certification helps demonstrate conformity with the applicable requirements for solar and heat pump water heater products.

CONDUIT SYSTEMS

- AS 61386.1
- AS/NZS 61386.21
- AS/NZS 61386.22

SGS TrustMark supports certification of conduit systems against relevant general and product-specific requirements.

ACCESS COVERS

- AS 3996

Certification provides independent evidence that access covers and grates have been assessed against the nominated standard.

Standards covered by SGS TrustMark

STRUCTURES AND CONSTRUCTION

Construction products must support safety, durability and dependable project outcomes. Independent product certification can strengthen confidence for manufacturers, specifiers, procurement teams and project stakeholders.

STRUCTURAL STEELWORK

- AS/NZS 5131

Certification supports confidence that structural steelwork is produced under an assessed system aligned with the requirements of the nominated standard.

GLASS AND GLAZING

- AS 2047
- AS 4666
- AS/NZS 2208
- AS 2080

SGS TrustMark helps demonstrate conformity for certified glazing products across safety, performance and application-specific requirements.

STRUCTURAL TIMBER

- AS 4669
- AS 2269.0
- AS/NZS 1328.1
- AS/NZS 4357.0
- AS/NZS 1748.1

Independent certification supports confidence in structural timber and wood-based products assessed against the applicable standard.

CONSTRUCTION FIRE

- AS/NZS 1221
- AS 3786
- AS 1603.3
- AS 1905.1
- AS 1530.3
- AS 1530.4

Certification helps demonstrate conformity for selected fire protection products and construction elements covered by the scheme scope.

SOUND INSULATION

- ISO 10140-2
- AS 1191
- AS ISO 717.1

Independent assessment supports consistent reporting and classification of sound insulation performance for certified products.

Your route to SGS TrustMark certification

WHY SGS?

Local coordination

Work with an Australian team that can coordinate application review, product testing, factory audits and certification activities across your supply chain.

Technical expertise

Access guidance from product certification specialists who understand standards, testing requirements and production control systems.

Connected global capability

Draw on the SGS global network to support testing and factory audit activities across domestic and international manufacturing locations.

Independent assurance

Build confidence with certification delivered through an independent technical review and decision process.

Ongoing support

Maintain certification through annual surveillance, renewal planning and practical support when products, standards or production arrangements change.

START WITH THE RIGHT CERTIFICATION PATHWAY

Tell us about your product, intended market and applicable standard. We will help you confirm the scope, evidence and next steps for SGS TrustMark certification.
