

On-site Laboratories

Trusted.
Independent.
Committed.

Whether establishing, optimizing or outsourcing laboratory operations, our on-site solutions deliver fast, reliable data at the point of need, enabling you to focus on core mining activities.

We design, equip, staff and operate on-site laboratories through flexible delivery models tailored to your project requirements. Our solutions integrate advanced technologies to deliver safer, faster and more consistent data.

Backed by our global laboratory network and technical expertise, we deliver validated methods, robust quality systems and scalable workflows across all major commodities.

SGS

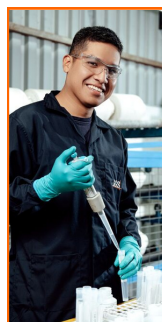

By partnering with us, you gain greater control over laboratory performance, faster turnaround times and improved project certainty. Ongoing audits, quality programs and participation in our Laboratory Quality System Improvement (LQSi) program help ensure consistent laboratory performance and data quality.

Why outsource your laboratory operations to SGS?

Flexible delivery models

Choose from integrated laboratory service models tailored to your project requirements, timelines and operational priorities, from establishing new on-site laboratories to managing existing operations.

Lab procurement

Leverage our global purchasing power to secure competitive pricing, reliable supply and efficient sourcing of consumables, reagents, equipment and logistics, helping you control costs and minimize supply chain disruptions.

Lab outsourcing & support

Reduce operational complexity through integrated staffing, laboratory management, training and technical oversight, helping you maintain consistent performance, quality and productivity throughout the project lifecycle.

Global expertise, local delivery

Access our global network of technical experts, local operational teams and commercial laboratories, providing method development, specialist support, surge capacity and backup analytical services throughout the project lifecycle.

Technology-enabled services

Accelerate decision-making through rapid, technology-enabled analysis using portable techniques, automated preparation, robotics and PhotonAssay™ technology where applicable.

Sustainable operations

Select options such as Mobile Sample Preparation Units (MSPU), helping you reduce sample transport, lower environmental impact and maintain operational efficiency.
