

# Sample Management Services

World leading testing, inspection and certification company SGS Pakistan Pvt Limited provides our customers with a true global one-stop shop for sample handling and distribution solutions to many industry segments, such as (specialty-) chemicals, oil and gas, agricultural products (crop protection), food ingredients and pharmaceutical ingredients. Our sample management and distribution services ensure your samples arrive quickly and meet the highest industry standards and IATA regulations.

When transporting dangerous goods, it is essential that the transport is conducted safely and in full compliance with relevant regulations. While shipping dangerous goods by air, it is crucial to take into account the potential adverse effects of temperature, pressure and humidity variations, as well as the risk of damage due to vibrations and improper handling.

SGS specializes in all aspects of the carriage of dangerous goods, from identification to packaging, marking, labeling and documentation.

We handle nearly every class of dangerous goods across a wide range of products, including:

- Chemicals
- Fine chemicals
- Petrochemicals
- Petroleum products
- Liquefied gases
- Aerosols
- Cosmetics
- Paints
- Batteries
- Dry ice
- Infectious substances
- Explosives

#### OUR SERVICES INCLUDE:

- Handling, packing and documentation of dangerous goods in UN-approved packaging either from our SGS locations or at the customer's premises
- Pick-up, collection, and storage of dangerous goods
- Identification, marking and labeling in accordance with applicable regulations
- Re-packing of damaged goods
- Re-packing according to the maximum net quantities allowed per package

- Completion of the IATA Shipper's Declaration for Dangerous Goods and other required transport documents
- National and International transport arrangements
- Dangerous goods safety advisor
- Dry-ice service
- Biologic services to hospitals, universities and research laboratories
- Cold Chain Logistics for Vaccines and biologics, warehousing and distribution, ensuring timely delivery of raw materials and finished products
- Biological Sample Management: Specialized handling and storage for biologics, cell lines, and tissue samples
- Clinical Trial Sample Support: Managing clinical trial samples

In the fast-paced and regulated pharma and biopharma sectors, precision and reliability are non-negotiable.

Our sample management services ensure your operations remain compliant, efficient, and focused on delivering life-saving therapies to market.

Standards are constantly changing. Storing samples takes up space and requires different conditions to be safely stored. Sending samples to your customers takes you away from your core business.

## Services adapted to your needs

### FULL SERVICE

Would you like to refocus on your core business activities? Would you like to no longer have to worry about preparing and shipping your different samples?

With SGS's full service option, you can benefit from our expertise from end to end. We will collect your bulk products, prepare your samples in different volumes, store them, pack and ship them to your customers' locations all over the world.

### PICK AND SHIP

Do you prefer to prepare your samples internally but still would like support with storing and shipping? With SGS's pick and ship option, we pick up your already prepared samples and store for you until your customer has requested a sample. Then we package and ship your sample.

### ON-SITE

Do you have the equipment and facilities to prepare and ship your samples internally, but lack the personnel? Are your personnel qualified and trained according to the latest standards and regulations?

SGS can place qualified and experienced personnel at your own facility to package and ship your samples.

## Shipping samples has never been easier

### 1. BULK COLLECTION

Our teams collect your products directly from your location.

### 2. PREPARING YOUR SAMPLES

- Compliance with international regulations
- Customizable compliant packaging
- Hazardous products expertise

### 3. STORAGE

We provide personalized services to manage your samples:

- Inventory management
- Compliance with safety standards

### 4. SHIPPING REQUEST

We have set up a platform allowing you to place your orders online in just a few simple clicks.

### 5. SHIPPING YOUR SAMPLES

- Urgency of requests taken into consideration
- Optimization of the best transport mode available (best speed of delivery/cost ratio)

## Why choose SGS?
