

Good Experimental Practice (GEP)

Trusted. Independent. **Committed.**

SGS

Ensuring high-quality, reliable and harmonized field trials

Good Experimental Practice (GEP) provides a structured framework for undertaking reliable and consistent efficacy trials in agriculture. It defines the principles for planning, executing, evaluating, documenting, and interpreting trials; ensuring adherence to high quality standards.

How we can support your field trials

At SGS, we deliver robust, GEP-compliant field trials that support your product's journey from concept to market. Our global network of experts combines local insight with precision to navigate complex regulatory frameworks and accelerate validation.

Whether you're screening, developing, or registering a product, we help ensure regulatory compliance, data integrity, and market readiness.

Our GEP-Compliant Solutions

We can undertake trials under the following disciplines and more:

- Acaracides
- Biopesticides
- Biostimulants
- Fertilizers
- Fungicides
- Herbicides
- Insecticides
- Marketing / demonstration
- Molluscicides
- Nematicides
- Plant growth regulators (PGRs)
- Stored crops
- Seed care

In addition to field trials, we provide comprehensive consultation and project management services, including trial design and planning, expert input on target pests and diseases, electronic data collection and regulatory-compliant submission.

Our teams ensure alignment with European and Mediterranean Plant Protection Organization (EPPO) guidelines,

Organization for Economic Co-operation and Development (OECD) and other international standards, while leveraging advanced technologies such as drone-based monitoring, GPS mapping, and high-resolution imagery to enhance trial precision and efficiency.

Why Choose SGS?

We are globally recognized as the benchmark for quality and integrity in field trial services.

With SGS, you benefit from proven expertise, cutting-edge technologies, and a global footprint, all tailored to the needs of your market.

Trusted. Independent. Committed.
