

Mechanical Auger Sampling Services

Trusted. Independent. Committed.

SGS

Pakistan's first commercial mechanical auger sampling system by SGS Pakistan PVT limited

SGS PAKISTAN PVT LTD MINERAL SERVICES

SGS Pakistan Private Limited proud to introduces Pakistan's first Commercial Mechanical Auger Sampling system, designed by SGS as per international standards. The Auger sampler is located near PIBT terminal, Port Qasim, Karachi to draw representative and unbiased coal samples from loaded trucks and dumpers as per international standards and safety protocols.

The station will facilitate all the cargo movement from port Qasim to plants and other stockyards.

WHY THIS MATTERS

Coal quality assurance has always been challenging during transportation, but with our new auger sampling system, we're bringing accuracy, efficiency, and safety to every shipment. Now, clients can trust that every load is sampled with utmost precision

OBJECTIVE

SGS provides inspection and supervision services such as sampling, quality analysis and weight certification of coal and coke during major inland trans-shipment points without much operational hindrance. Whether for cargo selling, buying or transporting coal or coke, SGS is first option ready to assist and independently verify shipment quality and weight without unloading.
