

Shirt. *Tested.*

Makes no difference if it's made of cotton, wool or linen, if you wear it for a job interview or a date night, if it's slim fit or loose.

As the world's leader in inspection, verification, testing and certification, SGS helps to ensure that your favorite shirt is safe to wear and long-lasting. In the end, it's only trusted because it's tested.

At SGS, we are expert in testing products for their: safety, quality, durability, chemical content, and compliance to regulations.

We conduct a full range of product testing, from safety and performance to functionality, to demonstrate that products meet international standards and perform to expectations without endangering consumers.

ETHIOPIA SOFTLINES SERVICES
