

Pet Supplement Solutions

Knowledge Inspired, Quality Driven.

Safety & Quality Assurance Services from a Trusted Industry Partner

As the market for pet food supplements becomes increasingly competitive, there has been a growing demand for supplement manufacturers to adhere to high quality standards with greater scrutiny over purity and quality. Our services reinforce confidence in your products by proving quality, safety, and adherence to regulatory standards.

SGS offers a single-source solution for all of your testing, regulatory and certification needs in the supplement industry. Our interdisciplinary team of food chemists, microbiologists, regulatory specialists and auditors will align your development timelines, helping you to cost-effectively bring consumer-friendly products to the marketplace.
