

# ASnAP – A Snapshot of lab results ASAP

Knowledge Inspired, Quality Driven.

Fast, secure & transparent access to test data – all in one secure portal.

ASnAP is an online portal for clients to access, download and track laboratory results. With 24/7 access to secure and confidential data, this centralized portal supports faster decision-making and supply chain transparency – empowering your choices with data you can trust.

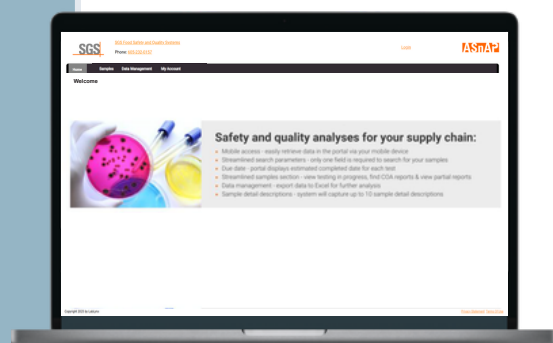

## KEY FEATURES

- **Real-Time Lab Results:** Live access to sample information.
- **Document Management:** Generate partial reports, Certificates of Analysis and historical data.
- **Due Date:** View estimated completion dates for each test.
- **Search Function:** Filter by product or date.

## HOW IT WORKS

1. **Log In Securely:** Access your portal from any device.
2. **View Lab Results:** Real-time access to all testing data; view partial or completed results.
3. **Download & Share:** Generate reports and certificates.
4. **Track History:** Monitor result data over time.

## Other FAQs

Questions	Answers
<b>Why choose ASnAP?</b>	<ul style="list-style-type: none"> <li>• <b>Streamlined Workflow:</b> See results for each test in real time.</li> <li>• <b>Included at No Cost:</b> Every client receives secure portal access with no setup fees or additional charges.</li> <li>• <b>Centralized Control:</b> Manage data and permissions across one or multiple plants with user-specific access levels.</li> <li>• <b>Flexible Data Access:</b> Export test results into various formats, including Excel, for easy integration with internal systems.</li> </ul>
<b>How does SGS handle data protection and confidentiality?</b>	<ul style="list-style-type: none"> <li>• All data is encrypted and securely stored.</li> <li>• SGS maintains rigorous confidentiality standards.</li> </ul>
<b>How can I equip my company with ASnAP?</b>	Getting started is easy. If you work with SGS as your lab partner, our team takes care of the setup and will send you secure login credentials – no further action is required.
<b>Can I go beyond real-time results to better understand our data?</b>	Yes – ask us about <b>SGS EMVision</b> , our software solution that digitizes the process of environmental monitoring programs (EMP) in food production facilities, turning your results into insights. With interactive dashboards and trend analytics, it simplifies sample management by visualizing your data, detecting patterns and moving toward predictive food safety monitoring powered by next-generation science.

From lab testing to decision-making, ASnAP redefines how you stay connected to your test results: faster, smarter and safer.
