PEST CONTROL

SANITEC offers its fumigation services for food products stored in warehouses and silos and various means of transit transportation. We also carry out gas free operations at unloading of ships or containers. Others operations, from animals trapping to insect control in buildings and industrial sites, comply with the HACCP approach with support of customised web information system.

ANALYSIS

Our multidisciplinary laboratories carry out physical and chemical, contaminants, microbiological and genetic analysis of any Agri commodity and food product working in total synergy with our inspection or control services.

We also monitor allegations and nutritional labeling.

We run GLP studies on physical and chemical, pesticides residus and ecotoxicological issues.
